CROSS REFERENCE TO RELATED APPLICATIONS

The present Application is related to the U.S. patent application Serial No 09/533,045, entitled "METHOD FOR CREATING A DATABASE FOR COMPARING MUSIC ATTRIBUTES", Attorney Docket Number M-8292 US, filed on March 22, 2000, assigned to the
15 Assignee of the present invention, and is hereby incorporated by reference in its entirety.

FIELD OF THE INVENTION

The present invention relates to business methods for presenting music to consumers that allows content based music searching.

BACKGROUND

20 Conventional retail stores ("brick and mortar" stores) present music to consumers inefficiently. When a consumer goes to a retail store to purchase music, for example, "Blockbuster"™ (Registered Trademark), the consumer has limited number of choices to search for music. One reason for the limited number of choices is that conventionally music is classified only in restricted number of classes, for example, music may be stored at a retail store
25 under the name of the artist, genre (Rock, blues, Jazz etc.), label, and title of the album etc.
